CHALLENGE

01.

Current hospital schedules
are still written and edited
via Excel, emails, phone calls

02.

Lots of daily red tape, changes to
keep track of

03.

Hospitals are dealing with work overload and
poor working conditions

05.

Consequently: longer
queues for patients

04.

Staff shortages and the flight of
dissatisfied staff

SOLUTION

- 01.** Enabling healthcare staff to focus on their work
- 02.** Structuring work processes
- 03.** De-bureaucratising work
- 04.** Preserving and improving work processes
- 05.** Better organisation improves the quality of communication and contributes to greater satisfaction among healthcare professionals

CUSTOMER FEEDBACKS

With the introduction of the application at the Department of Abdominal and General Surgery of the Surgical Clinic of the University Clinical Center Maribor, we raised the organization and planning of surgical interventions to a very high level. The time needed to plan operations has been significantly reduced, the possibility of human error in planning has been reduced, employees are provided with a more transparent and flexible insight into occupancy, and the programme also provides numerous reports from data on patients and performed operations.

— **Prof. dr. Stojan Potrč, M.D. , spec. surgeon (UKC MB)**

Head of the Department of Abdominal and General Surgery of the Surgical Clinic UKC Maribor

I can no longer imagine my everyday life at work without the PracticeMED application - the other applications mainly focus on shift-work planning, none of them cover the micromanagement of work in healthcare.

— **Samo Plut, M.D. (UKC LJ)**

Head of the KOGE endoscopy unit, Internal Clinic, KO for Gastroenterology UKC Ljubljana

Since I have started using PracticeMED I can't imagine my work without the application anymore!

— **Domen Kogler, M.D., anesthesiologist (UKC MB)**

Department of Anesthesiology, Intensive Care and Pain Therapy UKC MB
